EcoVersity: Sustainable Living/Earth-Based Learning

Concerned about the earth? Courses at the EcoVersity provide practical ways to learn land skills and sharpen your vision for a sustainable future.

EcoVersity courses are specifically designed for the climate and conditions of Northern New Mexico. We emphasize hands-on experiential learning leading to real world problem solving. Expanding one's powers of observation, awareness, and appreciation of the natural world is a hallmark of EcoVersity training. Our faculty of practical visionaries has each devoted their professional lives to learning and designing from nature. We are eager to welcome you this summer to the 13 acre EcoVersity campus on Agua Fria. This land is being designed as a seedbed for the teaching and modeling of a full range of sustainable systems, systems which participants can then apply to the backyards, farms, communities, and open lands of our Upper Rio Grande Bioregion..

Summer Schedule

8 Week Courses

V2-01 PERMACULTURE BASICS – Scott Pittman

Tuesdays, 6:30 to 9:00 pm
8 Weeks
Beginning, June 18th
Tuition \$185

Spend summer evenings learning the basics of permaculture design and ethics. Lectures and discussions will be augmented by hands-on experience as we explore such topics as pattern recognition, water harvesting, landscape design, and other methods for designing with nature.

Permaculture principles enable people to establish productive environments providing food, shelter, energy, material and non-material needs, as well as the social and economic infrastructures to support them.

Scott Pittman is well known as a senior teacher and collaborator with Bill Mollison, the grand old man of Permaculture. Together, they have been teaching and consulting, and have trained over a thousand Permaculture design graduates in the United States and abroad, including Australia, Russia, Belarus, Ukraine, Bali, Thailand, Nepal, Brazil, Colombia, Mexico and Ecuador. Scott currently lives, teaches, and consults in Northern New Mexico where he is co-founder and President of the Permaculture Institute, USA (PCI), President of the Board of the Permaculture Credit Union, and owner of Environmental Design Concepts. His firm specializes in Permaculture design and construction projects ranging from backyard designs to thousand-acre farms. pci@permaculture-inst.com

V2-02 VEGETABLE GARDENING – Marion Carter

8 Weeks
Wednesdays – Morning class; 9:00 to 11:30 am - \$185
Afternoon class; 1:30 to 4:00 pm - \$185
Both Morning and Afternoon \$280
Beginning June 19th

This course is for beginning and experienced

gardeners interested in getting the most out of their kitchen gardens throughout the year. Using the EcoVersity's Circle Garden as our workshop, we will plan, dig and plant, ending the session (and a lot of hard work!) with a garden party. Topics we will cover include: garden site selection and design, creating a fertile living soil, perennial and annual vegetable and herb varieties, double-dug bed preparation, drip irrigation basics, planning successful plantings for 4-season harvesting, season extension aids, direct seeding vs. transplanting, composting/generating organic matter from "waste" materials, and beneficial insects. How can we make the most of all that good food? Straight to the table, simple recipes and food preservation options will also be covered.

Parents interested in bringing young children to the class are encouraged to contact Marion to arrange for on-site childcare.

Marion Carter, BA St John's College, studied textile arts at Penland in North Carolina and at the Art Institute of Chicago. She has 10 years experience farming/market gardening in Vermont & New Mexico. After cooking & baking at the much-missed Natural Café, she co-founded One Straw Farm and CSA in 1995. For the past 5 years Marion has served as the Chair of the Education Committee at the Santa Fe Farmers' Market. She and her husband Mitchell live off the grid near Pecos, where she tends vegetables, bees, chickens, turkeys & their daughter, Sylvi. marion@newmexico.com

V2-03 DIRECT PERCEPTION AND THE CHINESE FIVE ELEMENTS- David Stone

8 weeks
Tuition \$185
Thursdays, 6:30 to 9:00, Beginning June 20th

In this class, we will explore the world of nature by sharpening observation, honing intuition, and extending awareness. We will relate our discoveries to those of the ancient Chinese sages who lived in the midst of the nature and saw the dynamic interplay of "wood", "fire", "earth", "water" and "metal". This Five Element energetic philosophy forms the basis of Oriental Medicine and for the practice of Plant Spirit Medicine. These essential observations are still up to date, and can provide us with insights into the harmonious workings of nature. We will bring discoveries made by direct observation of nature to class to share and discuss. Such practice will also enable us to explore the inner worlds of body, mind, and emotions to see the mutual reflection of inner and outer nature.

David Stone, Lic.Ac. Worsley Institute of Classical

Acupuncture, Advanced Lic.Ac., College of Traditional Acupuncture (UK), Masters in Acupuncture, Academy for Five Element Acupuncture, is a certified teacher with the renowned acupuncture master, Dr. J.R. Worsley and has trained in Plant Spirit Medicine with Eliot Cowan. A practicing acupuncturist since 1995, he has worked at South Bend Memorial Hospital and Mishawaka Community Hospital. David has held faculty appointments at the Institute for Taoist Education and at Naropa University. He maintains a Plant Spirit Medicine practice in Santa Fe. davidkstone@hotmail.com

V2-04 SOARING CRANE QI GONG; HARMONIZING YIN & YANG— Mark Turner

8 weeks

Tuition \$60 or \$9.00 per class

Thursdays, 9:00-10:30, Beginning June 20th

Qi is energy. 'Gong' is practice; therefore a practice of cultivating energy. Students will learn the 5 sequences of Soaring Crane Qi gong founded in China in 1979, as well as its place in Chinese medicine. Of the two applications of Qi Gong, martial arts and , China Soaring Crane belongs to the category of health maintenance Qi Gong. Focusing mind and breath, through physical movement, this practice improve the flow of "qi" by opening the meridians (internal energy pathways) and clearing blockages. The practice promotes physical and mental health leading to a greater sense of harmony with the Earth.

Mark Turner began practicing Zhan Zhuang Qi gong and Ba Duan Jin with Master Lam in London, where he was introduced to Soaring Crane Qigong. Mark continued training in Southeast Asia, under Shifu Ho, the respected teacher of China Soaring Crane Qigong. He further developed his practice by studying the five steps of Soaring Crane, the 7 remedy routines, stepping crane, standing meditation/zifa gong (spontaneous movement), and the use healing sounds. Mark was awarded his teaching certificate in Soaring Crane Qigong by Master Ho in Seremban, Malaysia. He has also studied Seiki and Katsugen, forms

of bodywork using spontaneous movement, with Akinobu Kishi, a longtime student of Shizuto Masunaga, founder of Zen Shiatsu. markh_2000@hotmail.com

V2-05 ALTERNATIVE BUILDING PRACTICUM – Clay Bridgford

8 Weeks

Tuition \$280

Fridays 9:00 to 4:00 pm, Beginning June 21st

Are you interested in building or helping to build your own structures? Would you like hands-on building experience? This course will teach the basics of building design, including foundations, framing, and roofing. We will employ such alternative building materials as strawbale, rastra, and rammed earth. Emphasis will be given to planning, tools, basic carpentry, window and door installation, insulation, and finishing. We will complete a building project on site at the EcoVersity campus. Participants with a building project may bring preliminary sketches.

Course is limited to twelve participants.

Clay Bridgford, BA,MA, has been teaching the courses in General Construction for the University of New Mexico, and has been giving strawbale workshops for Seed University, and Habitat for Humanity. He has extensive teaching and administrative experience in such diverse fields as cross-cultural communications, environmental education, and personal growth. Clay lives in a straw bale house he has designed and built. higermar@taos.com

You may use your credit card to register on-line at:

Workshops

May 18th & 19th

**Does not qualify for discount*

VW2-01 DROUGHT GARDENING- Priscilla Logan

May 18 and 19 at EcoVersity, 424-9797
Tuition for both Days \$95, \$55 per day

In this comprehensive two-day hands-on organic gardening course we will cover basic techniques for successful gardening in Northern New Mexico. Emphasis will be placed on low-water gardening. Registrants before May 9th will receive FREE gardening materials at the class.

Soil Preparation-Saturday, May 18th from 9:30 to 4:30 - Tuition \$55

Growing soil not plants produces healthier plants and vegetables. This workshop focuses on techniques to develop your soil to its fullest. Hands-on activities include double digging to give the soil deep places to store water and air, site selection, composting to provide nutrients for the soil, worms to vitalize the soil, soil testing with organic additive use, and mulching/wind breaks/sheet mulching to counteract the effects of wind.

Planting and Caring for the Garden Sunday, May 19th from 9:30 to 4:30 - Tuition \$55

A successful garden combines knowledge and experimentation. This workshop focuses on methods of planting as well as care. Hands-on activities include developing a garden plan, sowing-pricking from flats-transplanting, seed collecting, watering techniques from roof catchments, and earth friendly insect and gopher control.

Priscilla Logan has been establishing gardens in New Mexico for over twenty years in backyards, mountain meadows, and in rural and urban schools. She is a Permaculture Instructor as well as a graduate of John Jeavon's BioIntensive Garden Teacher Practicum. Her work as a pioneer in creating outdoor classroom instruction through the public schools in New Mexico won her the Outstanding Environmental Educator of the Year Award in 1998/99.
plogan@outdoorclassroom.org

Saturday, June 29th

VW2-02 Poetics of Place: World Poetry Forms - Miriam Sagan

Saturday June 29, 10:00 to 4:00 with a

lunch break

Tuition: \$55

In this workshop we'll learn poetic forms from a variety of bioregions to enrich our own writing. Poetic forms are well-trodden paths that take us through a landscape. Some are ancient, some are from far-off places - all migrate into English to be explored by contemporary poets. We will concentrate on the 'pantoum', a beautiful repeated form from the South Pacific, the 'chant/anaphor' from numerous cultures including the ancient Greek, and the 'renga', a collaborative Japanese poem. We will also explore short poetic forms - 'tanka' and 'haiku' which concentrate on the here and now-on the environment and our place in it. Bring a notebook and your favorite pen and expect to write!

Miriam Sagan is the author of twenty books, including a book on writing *Unbroken Line: Writing in the Lineage of Poetry* (Sherman Asher) from which these planetary forms are drawn. *Archeology of Desire* (Red Hen), is her most recent book of poetry. She has taught writing at the Georgia O'Keeffe Museum, The Santa Fe Children's Museum, Site Santa Fe, Santa Fe Community College, The University of New Mexico, and on-line for UCLA Extension and <writers.com>.
miriam1035@aol.com

July 6th & 7th

VW2-03 ANASAZI FARMING, GARDENING, AND WATER HAR- VESTING - Joel Glanzberg

Saturday July 6th 9:30 to 4:00 Meet at EcoVersity \$55

Sunday July, 7th 9:30 to 4:00 Meet at
Nambe Drugstore, Pojoaque shopping Center Shopping Center \$55

Tuition \$75 for two days

We will look at Pre-Colombian farming techniques in the Upper Rio Grande Bioregion. These Native American farmers not only survived but thrived in an environment where we struggle today. How did they accomplish this? What can we learn from them? The course will cover ancient crops, tools, seasonal cycles, and water catchment structures. The Saturday class will be at the EcoVersity where Joel will present a slide show, lecture and discuss the story of Anasazi gardening. We will also plant a small waffle garden. On Sunday, we will meet for a field trip to visit prehistoric agricultural sites in Northern New Mexico. Participants may join us for either Saturday or Sunday, or preferably both days.

Bring Lunch; wear a hat and hiking shoes.

Joel Glanzberg, BA Saint John's College, has

studied with John Todd at New Alchemy Institute, Permaculture with Bill Mollison, and is now employed by Regenesiis. He co-founded Flowering Tree with Roxanne Swentzell; a permaculture integrated homestead at San Juan Pueblo. Joel has taught courses at University of New Mexico, Prescott College, the Desert Botanical Gardens in Chinle, Arizona, and internationally in Peru and Brazil. His many talents include landscape design, blacksmithing, carpentry, and work as an adobero.
joelgla@yahoo.com

Saturday, July 13th

VW2-04 MUSHROOM GROWING FOR HOME USE- *Danny Rhodes*

Saturday, July 13th

9:00 to 4:00

Tuition \$65 (Includes materials fee)

This course will demonstrate a simple method for growing mushrooms in your own kitchen. A recently developed method using hydrogen peroxide makes home cultivation easy, fun and inexpensive. Participants will take home a starter batch of shi-take spawn and growing medium. The course will also include identification of the main types of edible mushrooms, a brief history of fungi, and an overview of the mushroom ecology.

Danny Rhodes developed his interest in mushrooms while attending the Western Culinary Institute in Portland Oregon. Paul Stamets' presentations at the Telluride Mushroom Festival and at the Bioneers Conference inspired him to grow mushrooms commercially. He is the founder of Desert Fungi, and can be encountered selling his mushrooms at the Santa Fe Farmers Market.

Saturday, July 20th

VW2-05 DRIP IRRIGATION SYSTEMS FOR GARDEN, ORCHARD & LANDSCAPE- *Sam Sutton*

Saturday July 20th

9:00-3:00

Tuition \$65

Save water this summer! This course provides a hands-on introduction to drip irrigation. We will install several types of drip lines in the EcoVersity

garden and demonstrate drip watering for a variety of plants, shrubs and trees, thus making use of limited water. We will answer questions regarding methods of assembly, various drip heads, timers, etc. To discuss your individual situation, please bring a sketch of your yard or garden with approximate dimensions.

Bring lunch & gloves

Sam Sutton, BA, M. Arch., is a longtime Santa Fe designer and landscaper. He installed his first drip system in 1976, and has been installing native plant landscapes with low water irrigation systems ever since. Lately he's been working as a permaculture designer and educator.
wabbisam@msn.com

Saturday, July 22nd

VW2-06 SMALL BATCH BIO-DIESEL - *Nicholas Espeset & Lisa Jeswald*

Saturday, August 3rd

9:00 to 4:00

Tuition \$45

In this class we will learn to make an inexpensive "backyard" biodiesel processor and make a reliable, renewable fuel whose main ingredient will be recycled cooking oil from local restaurants. Rudolph Diesel's first engine was designed to run on biodiesel. This fuel emits no net carbon dioxide making it an environmentally friendly alternative way to run diesel vehicles. We will produce a batch of fuel, and demonstrate its use in running a diesel engine. There will be a presentation of successful biodiesel use by individuals and organizations from around the world, as well as its potential from small scale to mass production.

Nicholas Espeset became interested in alternate fuels in the 1970's while working for NASA's Technology Application Center researching wind, solar and hydrogen technologies. As a technical consultant and project manager his projects range from motion picture special effects, to economics of seaweed harvesting, to systems planning for rural development. He served in the U. S. Coast Guard, where he was an Engineman and an instructor in Diesel mechanics.
nicholas@cnsr.com

Lisa Jeswald has worked on organic farms in France and New Zealand as shepherd, swineherd, beekeeper and organic gardener. She became interested in biodiesel at Antioch College. At the conclusion of this class she plans to drive her biodiesel 'fryer oil' truck across the country.
ljewald@antioch-college.edu

August 2nd to 4th & August 8th to 11th

VW2-07 HIGH MOUNTAIN HERB WALK-Janet Snowden & Tomas Enos

Friday August 2nd to Sunday August 4th
Tuition \$185 (with VW2-08; \$310.00)

Learn about native wild plants of New Mexico while camping in the high country. We will take an in-depth look at edible, medicinal, and useful botanicals in both riparian and dryland habitats. This practical hands-on fieldtrip focuses on plant identification, ecology, plant uses, preparations, sustainable collecting, conservation, and ethnobotany.

Limited to 12 participants.

*Students will be responsible for transportation,
camping gear, food, and learning supplies.*

VW2-08 GILA MOUNTAIN WILD PLANT GATHERING—Tomas Enos & Janet Snowden

Thursday, August 8th to Sun., August 11th
Tuition \$195.00 (with VW2-07; \$310.00)

Join us for a field course of wild herb and food gathering at the base of the Gila Forest in southwestern New Mexico. Like all nomadic farmers around the world we gather food and medicine that Nature provides in various ecosystems; the upper Chihuahuan Desert area offers a wide range of highly nutritious plants to supplement your gardens at home. From agaves to yuccas we'll learn and gather while exploring useful plant identification, uses, and preparations.

Limited to 12 participants

We will car pool to the site; students are responsible for transportation, camping gear, food, and field supplies.

Tomas Enos BA, MA, Ph.D. is an ethnobotanist and practicing herbalist. The owner of El Milagro Herbs in Santa Fe, Tomas has grown, wildcrafted, and manufactured herbal products for over 12 years. His doctoral dissertation described curanderas in Oaxaca, and he has worked with traditional healers in Latin America. He has taught herb classes at IALA, the Santa Fe Indian School Agroecology program, and has led tours to find herbs and to visit herbalists in Mexico, Costa Rica, and Ecuador. elmilagro@cnsnp.com

Janet Snowden, Doctor of Oriental Medicine and herbalist has grown, wildcrafted, and used native plants throughout the Southwest. As a nature photographer she has shown her herb photos in local galleries. Her teaching experience includes herb classes at the International Institute of Chinese Medicine and the New Mexico

Academy of Healing Arts. Janet also owned a 30-acre herb farm in Texas. snowflower@cybermesa.com

August 23rd, 24th, & 25th

VW2-09 SACRED SPACE: HEAL- ING OUR LAND- Sobonfu Some

Full Tuition \$160

Friday August 23 Public Presentation

\$10.00 (Students and Seniors \$6.00)

Saturday, August 24th 9:00 to 4:00

Sunday, August 25th 9:00 to 1:30

Sobonfu whose name means "Keeper of Rituals," is coming to share her wisdom and life experience with us in Santa Fe. She will present 'sacred space', as understood by her Dagara people of Burkina Faso, West Africa. The purpose of rituals is to take us to a place of self-discovery and mastery. They allow us to connect with the self, the community, and the natural forces around us. We will be enacting ceremonies for entering, greeting, and empowering space for the benefit of our place and time, with the intention of healing our earth and community.

Sobonfu Some was raised in the tradition of her West African Dagara Ancestors. She began her initiation at the age of five when the village elders realized she was speaking a language which came directly from the spirit world. Her wisdom inspires us to allow our indigenous selves to reawaken to the universal language of spirit. She is the author of two remarkable books, *The Spirit of Intimacy*, and *Welcoming Spirit Home*.

August 31st-September 4th

VW2-10 CHACO CANYON PIL- GRIMAGE - Colleen Kelly & Ruth Zaporah

Saturday, August 31st through Wednesday,
September 4th

Tuition: \$350

At Chaco Canyon the ancient ones maintained the equilibrium of earth and sky. They watched the stars, tilled the soil, carried water and kept the fires down through the ages. This ceremonial site of the Americas still carries a strong presence. It has the power to inspire and awaken in us a response to these troubling times. If we listen and move with attention, it opens us to the larger conversation of earth and sky.

We are calling this journey to Chaco Canyon a pilgrimage. In the company of each other, and in the spirit of this ancient place, we will open to its mysteries, look for guidance, examine personal and

ecological mind and rejoin body, mind and heart with the larger whole.

During these five days we will be sitting in silence; moving with and through the landscape with Ruth, learning the ecology and history of the canyon, hiking with Colleen to Pueblo Alto and other archeological sites, and learning star knowledge. Colleen will also share her understandings from cross-cultural wisdom maps of wholeness. These maps are integrative tools revealing the relationships between earth and sky, the elements and the potential enlightened qualities. We will conclude our stay with a ceremonial performance, which will evoke collective and personal guidance for the times ahead.

Ruth Zaporah is a New Mexico based performance artist, director and teacher internationally known for her innovative work in physical theater improvisation and performance. She is author of, Action Theatre: The Improvisation

Presence, and has taught and performed in Israel, Asia, and the USA, as well as in the refugee camps of Serbia and Croatia. She will be bringing to the Chaco pilgrimage the following questions. "How do our feet touch the land? How do we add our bodies to the landscape in a way that is conversational, interactive, and shares breath with the ecosystem?"

zap@actiontheater.com

Colleen Kelly, is an artist, author, teacher and consultant. She has a deep knowledge and appreciation for Chaco Canyon where she has led programs over the years for Omega Institute and Ojai foundation. She brings her background as a ceremonial leader, knowledgeable in the areas of mythologies and world religious traditions, to the Chaco pilgrimage. She co-produced The Box, a environmental teaching program, and has consulted with the Xerox Corporation teaching ecology for engineers. She is currently working on an installation, performance piece, celebrating elephants.
